**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant contacted Examiner about an interview and wanted to discuss the rejection of record. Though an interview was set up for 5/25/10, applicant wanted to discuss how Baillie was being interpreted. Applicant argues that Baillie teaches that reduction in the dosage of amitryptilline led to improvement of sputum and thus cystic fibrosis. As a result, applicant contends that low administration all the way to no drug administration (i.e. no amitryptilline) is therefore suggested by Baillie. After careful consideration, the Examiner agrees with applicant that Baillie does in fact teach away from administering amitryptilline to cystic fibrosis patient. The Examiner agreed to discuss the case the following day with Applicant and Supervisor Padmanabhan. .
